Medicare Advantage Risk Adjustment

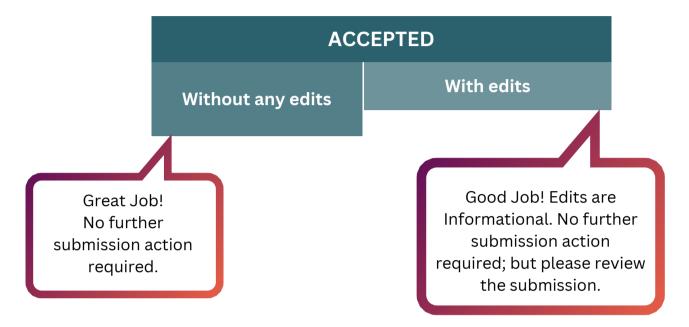

Basics 5 - EDPS Processing Status Overview

Risk Adjustment Made Easy: The Medicare Advantage Kind

When an Medicare Advantage Encounter Data Record or Chart Review Record (CRR) passes the Encounter Data Front End System to the Encounter Data Processing System (EDPS) for processing, the outcome of the processing is reported on the MAO-002 Report.

The outcome can be as follows:

Source:

CSSC Operations

Please note to review these for both header and lines of the record as applicable.
